New York Stock Market

NEW YORK, August 20. Following its course of the previous four days, the stock market was again very irregular when not altogether disorganized. At the opening most declines were fractional, but before the end of the first hour the movement gathered greater momentum, under a fresh accumulation of selling orders and recessions of two or more points were recorded throughout the active list.

The business of the morning session was estimated at over 700,000 shares. Just how much of this huge amount represented long stock, and how much operations for the decline, it is of course impossible to say. There were intermittent rallies, but early in the afternoon the list took a fresh start, with further liquidation in Union Pacific, Southern Pacific, Reading, United States Steel and others of the active group.

NEW YORK, August 20.—Money on call steady, 2¼ @2½ per cent; ruling rate and closing bid, 2¼; offered at 2½ per cent. Time loans quiet and steady; sixty days, 2½ @3 per cent, and ninety days, 3@3¼ per cent, six months, 3½ @4 per cent. Prime mercantile paper, 4 to 4½ per cent. Sterling exchange steady, with actual business in bankers' bills at \$4.8565 @\$4.5510 for sixty-day bills, and at \$4.8665 for demand. Commercial bills, \$4.844 @\$4.84%. Bar silver, 51. Mexican dollars, 44.

CHICAGO GRAIN MARKET.

CHICAGO, ILL., Augus, 29--ideal weather, for the harvesting of the new crop of wheat in the Northwest caused a severe sump in wheat prices on the Board of Trade to-day, but much of the loss was subsequently regained on covering by shorts. At the close prices were \$45 to lower than yesterday's firal figures. Corn closed strong, oats steady and provisions casy.

The movement of new wheat in the Northwest is gaining daily and reports from the spring wheat country were again of most optimistic character as regards the prospective yield. Several of the isading holders were free sellers during the first half of the day, particularly of the September decivery, but late in the session offerings became much more meaging.

Growing belief that the corn crop of the Southwest is being seriously injured by drought neptred lively buying of corn, which resulted in a strong tally following a sump early in the day, due to the break in wheat. The market, closed strong with pites up \$4.5 to 16 1/2.

Oats were extremely weak early in the day, but became much steader late in the sexsion. Prices at the close were a shade lever to je, higher. CHICAGO GRAIN MARKET,

NEW TORK, August 20.—R. G. Dun & Co.'s review of trade to-merrow will say:

"Reports from the principal cities unite in confirming the revival in trade, The prospect is that the volume of business will before long attain such proportions that maximum capacity will be reached and labor be at a premium. In the iron and steel trade this condition seems to be already in sight, Railreads are enjoying such increases frearnings and such assurances of good crops that they are buying freely of steel rails and other supplies.

"In the dry goods market jobbing houses report a much better business than a year ago. Orders for iron and steel are increasing so rapidly that mills and furnaces experience difficulty in making deliveries, and in some thestances premiums are being paid for prempt shipment.

"Additional orders for shoes are not coming in very freely, and shoe manufacturers do not look for much business until the close of this month. The New England factories are pretty fully employed and have a good volume of business. Leather rules quiet. "Less favorable crop and weather nows caused an advance in prices of the leading farm staples."

Returning Activity Stimulates Business in Southwest Virginia. [Special to The Times-Dispatch.]
BRISTOL, VA., August 20.—Operations in the coal fields of Southwest Virginia are being resumed as fast as men can be secured for the work, and within the last two weeks there has been a material increase in the tonnage of coal and coke.

Double-header trains are being operated on the Virginia and Southwestern Rallway for the first time. There is every indication of a general revival in the coal fields, and it is said that orders are coming in rather briskly, although prices are still somewhat demoralized.

Little has been done as yet looking to the resumption of the iron business.
